

## Overview

**For an adventure-filled holiday, perfect for those seeking scenic and picturesque trekking, including peak climbing, join us on Mt. Himlung expedition, one of our most popular trips.**

Mount Himlung, a highly demanding peak for climbers, stands at an elevation of 7,126 meters (23,379 feet) above sea level. Located in the Himalayan range northwest of Mount Manaslu on the border of Tibet and Nepal, it can be found at approximately 28.8224° N latitude and 84.7254° E longitude in the Manang district of Nepal.

The first ascent of Mount Himlung occurred on October 25, 1992, by a Japanese team led by Yoshinobu Ohta, with climbers Masakazu Ueki, Kazuhiro Takahashi, and Nyima Tsering Sherpa. Initially called Nemjung, the mountain was extremely challenging to climb due to its route. However, the KOBLER & PARTNER expedition operator team opened a new climbing route early in the year that is less risky and challenging than the previous route.

Due to the safe climbing conditions and reasonable time and cost, Mount Himlung has become increasingly popular among novice and professional climbers. In my opinion, Mount Himlung is one of the safest mountains in the world, with no reports of accidents, lost climbers, or property since the new route was opened.

With proper preparation, including 30 to 35 days of vacation time, the necessary equipment, good acclimatization, and physical fitness, Mount Himlung is not a difficult peak to climb. Mount Himlung offers unexpected wonderful experiences for climbers. To reach the summit at 7,126 meters (23,379 feet), climbers must travel by car or jeep from Kathmandu via the famous Annapurna circuit route, and then trek through the ancient lands of the Khamba Tibetan people. Along the way, tourists will witness breathtaking views and visit Buddhist villages such as Nar and Phoo, as well as yak and sheep huts. During the summit push, climbers will need to traverse huge moraines, climb over rocky terrain and permanent snow fields, navigate crevasses, and finally ascend a 75-80 degree vertical slope with the support of fixed line ropes and a guide rope. Upon reaching the summit, climbers will be rewarded with breath-taking panoramic view. From top, we can see Mount Manaslu in front of us, as well as Mount Annapurna, Mount Dhaulagiri and numerous other mountains around us.

If you're interested in climbing Mount Himlung, consider joining our international expedition group. We have set up a luxurious base camp during the peak climbing seasons and are available 24/7 to provide you with the best service. Don't hesitate to email us.
