

Overview

The Island Peak (6,189 meters) and Lobuche East Peak (6,119 meters) climbing, as well as the classic Everest Base Camp trek in Nepal, offer incredible and diverse landscapes.

Island Peak is a popular trekking peak located in the heart of the Everest region and offers stunning views of the surrounding mountains, including Mount Everest. The peak itself presents a challenging climb that requires basic mountaineering skills. The trek to Island Peak starts with a flight to Lukla and follows the classic route to the village of Namche Bazaar, known as the Sherpa capital and a bustling tourist hub in the remote region of Nepal. Trekkers typically stay in Namche for two nights to acclimatize before heading towards higher elevations. The trek then continues to the Everest Base Camp before reaching the Island Peak Base Camp. The final ascent to the summit involves a steep snow headwall, a rocky trail, and often requires the use of crampons, an ice ax, and guide ropes or fixed lines. The views from the summit are truly breathtaking, offering a panoramic view of the Himalayas, including nearby peaks such as Lhotse, Lhotse Middle, Lhotse Shar, Makalu, and Ama Dablam, among others.

Lobuche East Peak is another challenging but rewarding trekking peak located near the popular Everest Base Camp trek route. The trek to Lobuche East Peak involves following the trail through rocky moraines, huge rock slabs, and then making a steep ascent up snow slopes to the summit. The views from the top are breathtaking, offering a panoramic view of the surrounding peaks, including mighty Mount Everest, Makalu, Pumori, Nuptse, and Lhotse.

The classic Everest Base Camp trek takes you to the base of the world's highest mountain, Mount Everest. The trek starts with a flight to Lukla and then follows the trail through the heart of the Khumbu region, passing through traditional Sherpa villages, crossing high suspension bridges, and offering stunning views of the surrounding peaks along the way. The final destination, the base camp, is located at the foot of Mount Everest and offers a view of the impressive glaciers and ice cliffs of the Khumbu Icefall.
